Knockers and sore-heads never built a city.

There are thousands of acres of valuable and fertile land in the Pecos Valley that could be irrigated and doubled in value by simply placing water on the land. Further than that the water can be secured at a comparatively small cost.

As a politician Taft has proved a dismal failure. It is not too late for him to cut out politics and turn his attention to performing to the best of his ability the duties of the office to which he was elected. Presidents are not placed in the White House to serve the parties to which they belong but to serve the people.

John W. Kern was nominated by the Democrats of Indiana late Thursday afternoon for United States senator to succeed Beveridge. This is as it should be. Kern is the best man for the place among the candidates suggested, and he has earned the place. More than that he will be the next senator from Indiana.

See to it that your name is listed by the census enumerator of your ward. It is important that Roswell should make as good a showing as possible, and if a single name is missed the city loses just that much. Yesterday we published the names of the enumerators for each ward. If your name has not been secured call up the proper enumerator and see that your name is properly listed. If in doubt about the correct enumerator call up the Record Office and we will tell you.

Whooping cough is one of the most deadly of the children's diseases, and yet many people do not take it seriously and think nothing of exposing their neighbors' children and all the children of the city to infection. The period of infection is very long and the commonest sentiments of humanity ought to hold parents from exposing others to the disease, while the terrible death rate among children should prompt the determined and

efficient efforts to effect a cure in each case and prevent complications. —El Paso Herald.  
And this applies to measles, also.

Up in Denver the census enumerators have finished their work, showing a population of 180,000. At the same time a census taken by the Denver Chamber of Commerce showed something over 200,000 and the postmaster has lists showing 185,000 people are served by mail carriers and he estimates that at least ten thousand people are in the city who receive their mail otherwise. As the result of this variance, the official enumerators will check over the lists furnished by the Chamber of Commerce and the correct population of Denver will probably be secured for the official report. Something of the kind should have been done here in Roswell. As it is the official population of Roswell is quite likely to be less than the real population, and this will not be the fault of the enumerators, either.

Not merely a light cigar—but mild, too—mild all through. The same gentle flavor—the same delightful quality in the filler as well as the wrapper.

Made of tobacco mild by nature; not harvested green, and harsh, for the sake of color, but ripened in the fields and cured in the warehouse before it reaches the maker's bench.

There isn't a sore throat, or a heart-start in a lifetime's supply.

## Little Bobbie 5c Cigar

Is half the size and half the price. Leaf and labor alike. Simply reduced in length and cost to give you a really good and a really mild smoke for a nickel.

well.

A noted modern writer has said, "Job is the sublimest drama ever penned." Though the most ancient it is placed among the sublimest poems of universal literature. In dignified conception the author moves to his conclusions amidst speeding planets, parched desert, laughing waters, mountains strength and moaning seas. And the question he answers, is "How can good men suffer if God is good?" Duet, Grouner,—"Forever With the Lord," Mrs. Mullane and Mrs. Maxwell.
